Features Introduced in Each Version of Chief Architect

Reference Number: **KB-02963**

Last Modified: **March 29, 2023**

The information in this article applies to:

QUESTION

I am considering upgrading to a newer version of Chief Architect. Where can I find information about the new features in each product?

ANSWER

With each new version of Chief Architect, a PDF (Portable Document Format) file is created detailing the new features. You can view these PDF files under the Attachments section located at the bottom of this article.

Additionally, you can view the Features Introduced in Recent Versions (https://www.chiefarchitect.com/videos/playlists/132/features-introduced-in-recent-versions-of-chief-architect.html) video playlist.

If you're currently using an older version of Chief Architect and your SSA (Support & Software Assurance) (https://www.chiefarchitect.com/products/ssa/) has expired, visit:

https://www.chiefarchitect.com/products/upgrade.html
(https://www.chiefarchitect.com/products/upgrade.html) to learn more about
upgrading.

If your SSA is current, you can upgrade to the latest Chief Architect version at no
additional cost. Please visit KB-01974: Upgrading to the Latest Version of Chief
Architect (https://www.chiefarchitect.com/support/article/KB-01974/upgrading-to-the-
latest-version-of-chief-architect.html).

If you have any further questions about upgrading, please contact our Sales team
(https://www.chiefarchitect.com/company/contact.html) directly.

If you are going to be migrating files forward from an older version to a newer version,
please review the current version Migration Guide located in your Digital Locker for
how to bring these files forward correctly.
